The Cambridge Science for the Victorian Curriculum series are resources that truly address the requirements of the curriculum, provide much needed support for implementing STEM in the classroom, help to engage every student in science, and include valuable digital resources that genuinely enhance science teaching and learning.

- A resource developed by a team of authors who are excited to offer a fresh approach to teaching science drawing on current best-practice.
- Practical support for implementing STEM with authentic activities in every chapter, created and/or reviewed by STEM experts, that draw on real-world problems to engage students.
- A range of activity types to cater for different abilities and interests that will support and extend every Year 7–10 science student.
- Innovative digital capabilities, fully integrated with the print textbook and powered by Cambridge Edjin, the same platform that powers Cambridge HOTmaths – our trusted teaching and learning system that delivers rich and engaging digital resources and a powerful Learning Management System.

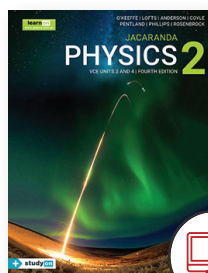

PHYSICS

**Jacaranda VCE
Physics 1&2
Print/LearnON/StudyON 4E**
Publish date 23 Oct 2019

P11155

RRP \$94.95

**Jacaranda VCE
Physics 3&4
Print/LearnON/StudyON 4E**
